DETAILED ACTION

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor suggests the growing an epitaxial layer on the uncovered sidewall of the trench forming an intermediate layer on the epitaxial layer and introducing a dopant into the epitaxial layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wurster et al. (US Patent 6,509,599) disclose a trench capacitor with insulating collar but fails to disclose the epitaxial layer on the sidewall forming an epitaxial layer on the sidewall and introducing a dopant into the epitaxial layer. Radens et al. (US Patent 6,566,177) disclose silicon-on-insulator vertical array device with a trench capacitor. Karcher et al. (US Pre-grant Publication US 2003/0168690) semiconductor memory cell with a trench capacitor.
